**RE: Comments on EPA Proposed Plan for Portland Harbor Superfund Site cleanup
To Whom It May Concern:**

Mt. Hood Community College (MHCC) offers a variety of classes to students living in the Portland Metro area, serving more than 30,000 students each year. With 120 associate degrees, certificate programs and transfer options available, MHCC provides opportunities for community members to pursue and accomplish their dreams.

We recognize the Proposed Plan marks a significant milestone in a very long process for the Portland Harbor Superfund site. We support a river cleanup that protects the health of Portlanders and is done cost-effectively. Mt. Hood Community College encourages the EPA to select a remedy that will allow for cleanup to begin quickly and will provide the opportunity for the working harbor in Portland to continue to thrive and grow.

Thank you for the opportunity to provide these comments.
